## FLAME TYPES

### CYCLONE FLAMES

The rotating flames wrap around the pipes giving an even heat distribution. Ideal for brazing, soft soldering and plumbing etc.

### PINPOINT FLAMES

Fine pointed flames with a distinct core. Ideal for fine work on gold, silver and lead etc.

### STANDARD FLAMES

Strong, powerful flames for general soldering and heating.

### POWER FLAMES

Large powerful, windproof flames for efficient outdoor use. Ideal for roofing, road-working and large scale heating.

### HOT AIR FLAMES

Powerful windproof hot air streams. Ideal for paint stripping, heat shrinking, heating of PVC and roofing etc.

### SOFT FLAMES

Sweeping, powerful flames with visible yellow tip. Ideal for cable work and heat shrinking.

### FLAT FLAMES

Powerful and windproof wide flame. Ideal for paint stripping and ski waxing etc.
