

FEATURES

- Safe, effective and rapid gas leak detection
- Water-based and eco-friendly
- Multi-system leak finder. Detects all gas types and system cracks including refrigerants, natural gas and compressed air
- Foamy and non-corrosive
- Quickly identifies leaks with bubble formation
- Solvent, oil & silicone-free
- Non-toxic
- High surface tension for reliable bubble formation

USED FOR

Gas heating tools, gas bottles, BBQs, stoves, hose connections, refrigeration coils, condensers, air compressors

FIRST AID

- **Skin contact:** Remove contaminated clothing and rinse skin thoroughly with running water
- **Eyes:** Rinse with water/saline. Seek medical help if severe
- **Inhalation:** Fresh air. Oxygen if needed. Seek medical help if breathing is difficult
- **Ingestion:** Can cause vomiting, immediately attend hospital for medical treatment
- **Clothing:** Wash before reuse

GAS LEAK DETECTION FOAM

Micro Leak Detector

500ml / 520g

INSTRUCTIONS

WARNING GAS LEAKS ARE HAZARDOUS

Before ignition, or when checking for leaks, lightly spray connections with Gas Leak detection Foam. Any signs of bubble formation indicate a leak

Never ignite an appliance or continue to use the appliance if you detect any bubbles. Disconnect, repair, reconnect, and re-spray before re-igniting

Never have an open flame near any suspected leak

WARNING

KEEP OUT OF REACH OF CHILDREN

Do not eat, drink or smoke during use, ensure good ventilation

Store in a cool, dry, well ventilated location, below 45°C. Keep upright, away from heat/ignition

Keep away from fire and heat sources

Avoid skin/eye contact

Do not puncture/incinerate, may explode if heated

CAUTION: For maximum protection, always wear safety goggles, gloves or other appropriate equipment.
